Hiss--Zinsser

A Text-Book of Bacteriology

A Practical Treatise for Students and Practitioners of Medicine

By

PHILIP HANSON HISS, JR., M. D., Professor of Bacteriology in the College of Physicians and Surgeons, Columbia University, New York,

And

HANS ZINSSER, M. D., Instructor in Bacteriology in the College of Physicians and Surgeons, Columbia University, New York.

In this work the writers have covered the ground of General Bacteriology, laying particular emphasis upon those micro-organisms specifically concerned in the etiology of infectious diseases. The questions of immunity have been treated as thoroughly as possible, but with sufficient simplicity to make them comprehensible to those not technically trained in this branch of medicine. The book is intended not only for students, but for those practitioners who may desire to keep informed in the advances of modern bacteriology, but who have not the time to search the voluminous literature themselves.
