Stamp, L. Dudley (Editor). *International Geographical Union: Report of a Symposium held at Makerere College, September 1955.* London, 1956. Geographical Publications Ltd. Pp. 104. Price 5s.

THE International Geographical Union was formed in 1924 but International Geographical Congresses have been held at intervals since 1871. This Report, after a foreword by Dr. L. Dudley Stamp, C.B.E., President of the Union, prints twenty-one contributions to the 1955 Symposium which dealt specifically with "Natural Resources, Food and Population in Inter-Tropical Africa." Of particular interest is an outline of the work done on the World Land Use Survey: in 1949 the Lisbon Congress appointed a Commission to examine the possibility of carrying out a world-wide survey or inventory of land use; a scheme of land use categories was drawn up and emphasis was laid on the necessity of using a master key of universal application, and the publication of maps on the only scale for which complete world coverage exists. The symposium touches on the application of this scheme to various countries in Inter-Tropical Africa.
