This is an electronic appendix to the paper by Eggert *et al*. The evolution and phylogeography of the African elephant inferred from mitochondrial DNA sequence and nuclear microsatellite markers. *Proc. R. Soc. Lond.* B **269**, 1993—2006.

Electronic appendices are refereed with the text. However, no attempt is made to impose a uniform editorial style on the electronic appendices.

Electronic appendix A

Polymorphic positions of mtDNA haplotypes used in this study. Dots indicate agreement with the sequence of Af8, "–" indicates an insertion/deletion site, and substitutions found only in Asian elephants are in patterned cells. Sequence corresponds to bases 15183-15773 of Hauf *et al.* (2000).
