beta−Lactam resistance
Naphthalene degradation
Valine, leucine and isoleucine degradation
Butanoate metabolism
Glutathione metabolism
Geraniol degradation
Bisphenol degradation
Toluene degradation
Mismatch repair
Phosphonate and phosphinate metabolism
Nitrogen metabolism
Linoleic acid metabolism
Pentose and glucuronate interconversions
Chloroalkane and chloroalkene degradation
Alanine, aspartate and glutamate metabolism
Ubiquinone and other terpenoid−quinone biosynthesis
Biosynthesis of ansamycins
Glycine, serine and threonine metabolism
Isoquinoline alkaloid biosynthesis
Carbon fixation pathways in prokaryotes
Penicillin and cephalosporin biosynthesis
Novobiocin biosynthesis
Riboflavin metabolism
RNA degradation
Vitamin B6 metabolism
Oxidative phosphorylation
Arginine and proline metabolism
Protein processing in endoplasmic reticulum
MAPK signaling pathway − yeast
Citrate cycle (TCA cycle)
Pyruvate metabolism
Indole alkaloid biosynthesis
Histidine metabolism
Phenylalanine metabolism
Methane metabolism
Benzoate degradation
