

Autism spectrum disorder overview

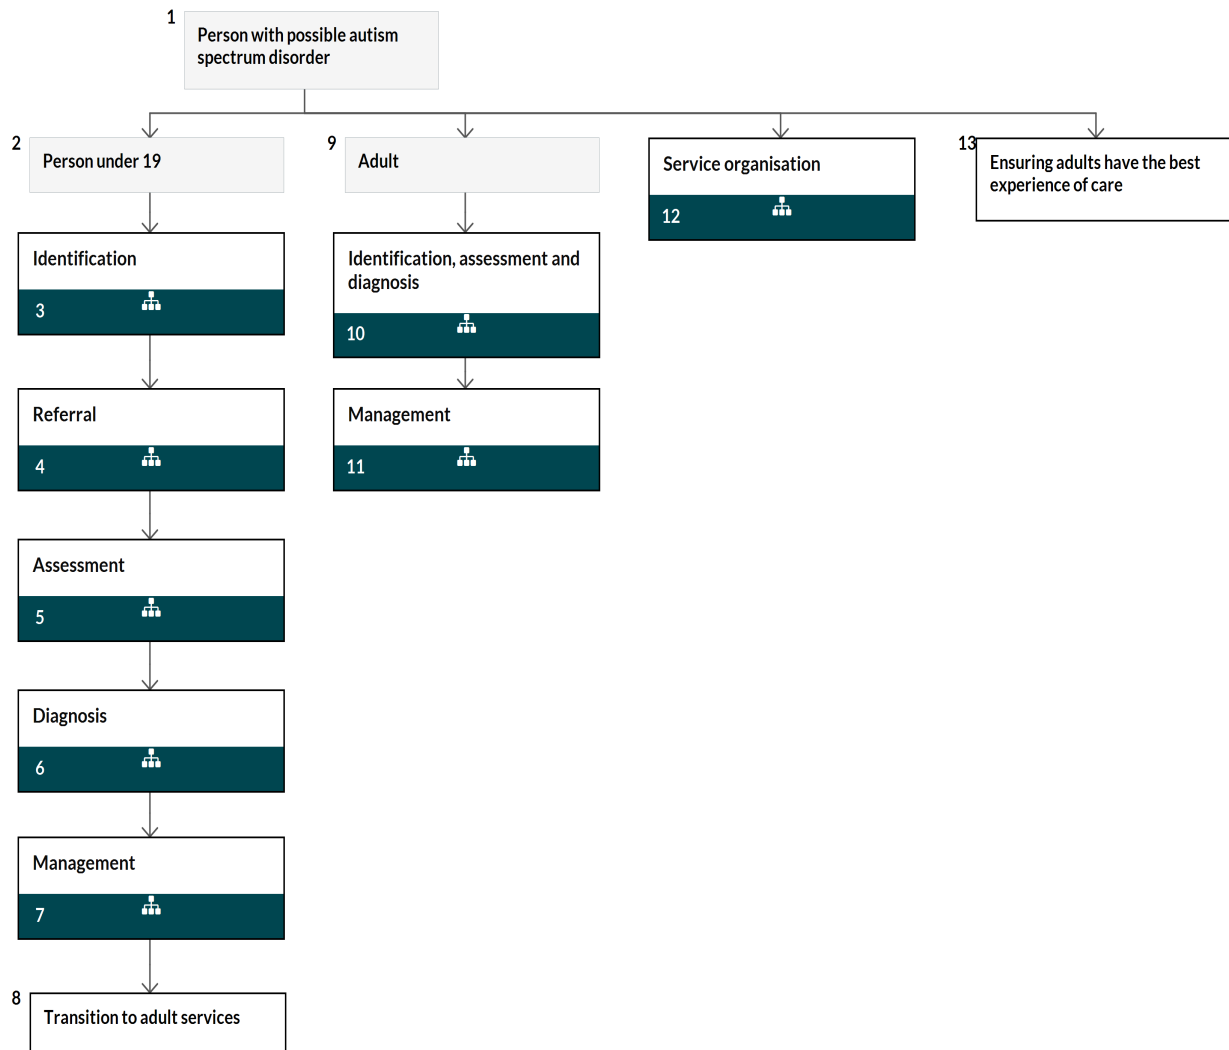

NICE Pathways bring together everything NICE says on a topic in an interactive flowchart. NICE Pathways are interactive and designed to be used online.

They are updated regularly as new NICE guidance is published. To view the latest version of this NICE Pathway see:

<http://pathways.nice.org.uk/pathways/autism-spectrum-disorder>

NICE Pathway last updated: 14 June 2021

This document contains a single flowchart and uses numbering to link the boxes to the associated recommendations.

1 Person with possible autism spectrum disorder

No additional information

2 Person under 19

No additional information

3 Identification

5 Assessment

[See Autism spectrum disorder / Assessing autism spectrum disorder in under 19s](#)

6 Diagnosis

[See Autism spectrum disorder / Diagnosing autism spectrum disorder in under 19s](#)

7 Management

[See Autism spectrum disorder / Managing autism spectrum disorder in under 19s](#)

8 Transition to adult services

Local autism teams should ensure that autistic young people who are receiving treatment and care from CAMHS or child health services are reassessed at around 14 years to establish the need for continuing treatment into adulthood.

If continuing treatment is necessary, make arrangements for a smooth transition to adult services and give information to the young person about the treatment and services they may need.

The timing of transition may vary locally and individually but should usually be completed by the time the young person is 18 years. Variations should be agreed by both child and adult services.

As part of the preparation for the transition to adult services, health and social care professionals should carry out a comprehensive assessment of the autistic young person.

The assessment should make best use of existing documentation about personal, educational, occupational, social and communication functioning, and should include assessment of any coexisting conditions, especially depression, anxiety, ADHD, OCD and global delay or intellectual disability in line with [comprehensive assessment](#).

For young people aged 16 or older whose needs are complex or severe, use the CPA in England, or care and treatment plans in Wales, as an aid to transfer between services.

Involve the young person in the planning and, where appropriate, their parents or carers.

Provide information about adult services to the young person, including their right to a social care assessment at age 18.

During transition to adult services, consider a formal meeting involving health and social care and other relevant professionals from child and adult services.

For more information, see [the NICE Pathway on transition from children's to adults' services](#).

9 Adult

No additional information

10 Identification, assessment and diagnosis

[See Autism spectrum disorder / Identifying, assessing and diagnosing autism spectrum disorder in adults](#)

11 Management

[See Autism spectrum disorder / Managing autism spectrum disorder in adults](#)

12 Service organisation

[See Autism spectrum disorder / Service organisation and delivery for autism spectrum disorder](#)

13 Experience of care

Use these recommendations together with the recommendations in the NICE Pathways on:

- [patient experience in adult NHS services](#)
- [service user experience in adult mental health services](#).

Glossary

ADHD

attention deficit hyperactivity disorder

CAMHS

child and adolescent mental health services.

OCD

obsessive compulsive disorder

Your responsibility

Guidelines

The recommendations in this guideline represent the view of NICE, arrived at after careful consideration of the evidence available. When exercising their judgement, professionals and practitioners are expected to take this guideline fully into account, alongside the individual needs, preferences and values of their patients or the people using their service. It is not mandatory to apply the recommendations, and the guideline does not override the responsibility to make decisions appropriate to the circumstances of the individual, in consultation with them and their families and carers or guardian.

Local commissioners and providers of healthcare have a responsibility to enable the guideline to be applied when individual professionals and people using services wish to use it. They should do so in the context of local and national priorities for funding and developing services, and in light of their duties to have due regard to the need to eliminate unlawful discrimination, to advance equality of opportunity and to reduce health inequalities. Nothing in this guideline

should be interpreted in a way that would be inconsistent with complying with those duties.

Commissioners and providers have a responsibility to promote an environmentally sustainable health and care system and should assess and reduce the environmental impact of implementing NICE recommendations wherever possible.

Technology appraisals

The recommendations in this interactive flowchart represent the view of NICE, arrived at after careful consideration of the evidence available. When exercising their judgement, health professionals are expected to take these recommendations fully into account, alongside the individual needs, preferences and values of their patients. The application of the recommendations in this interactive flowchart is at the discretion of health professionals and their individual patients and do not override the responsibility of healthcare professionals to make decisions appropriate to the circumstances of the individual patient, in consultation with the patient and/or their carer or guardian.

Commissioners and/or providers have a responsibility to provide the funding required to enable the recommendations to be applied when individual health professionals and their patients wish to use it, in accordance with the NHS Constitution. They should do so in light of their duties to have due regard to the need to eliminate unlawful discrimination, to advance equality of opportunity and to reduce health inequalities.

Commissioners and providers have a responsibility to promote an environmentally sustainable health and care system and should assess and reduce the environmental impact of implementing NICE recommendations wherever possible.

Medical technologies guidance, diagnostics guidance and interventional procedures guidance

The recommendations in this interactive flowchart represent the view of NICE, arrived at after careful consideration of the evidence available. When exercising their judgement, healthcare professionals are expected to take these recommendations fully into account. However, the interactive flowchart does not override the individual responsibility of healthcare professionals to make decisions appropriate to the circumstances of the individual patient, in consultation with the patient and/or guardian or carer.

Commissioners and/or providers have a responsibility to implement the recommendations, in their local context, in light of their duties to have due regard to the need to eliminate unlawful discrimination, advance equality of opportunity, and foster good relations. Nothing in this interactive flowchart should be interpreted in a way that would be inconsistent with compliance with those duties.

Commissioners and providers have a responsibility to promote an environmentally sustainable health and care system and should assess and reduce the environmental impact of implementing NICE recommendations wherever possible.
