ABSTRACT

This document contains supplementary material.
Supplementary Figure S1. Volumetric evolution for the remaining five of 14 patients. The relative values with respect to preoperative volume of non-enhancing $T_2$-hyperintense tissue (NCE-$T_2$, solid line) and contrast-enhancing tumor (CET, dashed) over time for BraTumIA (red), Rater-1 (blue) and Rater-2 (violet) are shown. The figures “a” to “e” are different patients.
