Supplementary Information

Catestatin-A Novel Predictor of Left Ventricular Remodeling After Acute Myocardial Infarction
Dan Zhu\textsuperscript{1,3}, Hong Xie\textsuperscript{1,2,3}, Xinyu Wang\textsuperscript{1}, Ying Liang\textsuperscript{1}, Haiyi Yu\textsuperscript{1}, Wei Gao\textsuperscript{1*}

Supplementary Figure 1 Histograms showing the distribution of plasma catestatin concentrations at different time points (ER, D3, and D7). The p values for the comparison are indicated.
Supplementary Figure 2 Receiver operating characteristic curves (ROC) showing the ability of NT-proBNP to predict echocardiography parameter changes. Specificity as well as sensitivity was determined. The diagonal was shown in each diagram.
