

Acknowledgment Statement for Dissemination of Findings from Use of HeLa Genome Data For

dbGaP Data Submitters:

The genome sequence described/used in this research was derived from a HeLa cell line. Henrietta Lacks, and the HeLa cell line that was established from her tumor cells without her knowledge or consent in 1951, have made significant contributions to scientific progress and advances in human health. We are grateful to Henrietta Lacks, now deceased, and to her surviving family members for their contributions to biomedical research. The data generated from this research were submitted to the database of Genotypes and Phenotypes (dbGaP), as a substudy under accession number phs000640.

For dbGaP Data Users:

The genome sequence described/used in this research was derived from a HeLa cell line. Henrietta Lacks, and the HeLa cell line that was established from her tumor cells without her knowledge or consent in 1951, have made significant contributions to scientific progress and advances in human health. We are grateful to Henrietta Lacks, now deceased, and to her surviving family members for their contributions to biomedical research. The request to use HeLa data for this research was approved by the NIH Director based on the recommendations of the Advisory Committee to the Director and the evaluation by its HeLa Genome Data Access Working Group (<http://acd.od.nih.gov/hlgda.htm>). The genomic datasets used for analysis described in this manuscript were obtained from the database of Genotypes and Phenotypes (dbGaP) through dbGaP accession number phs000640.
